

Miniature Slide Switch 413-0D

A multiusable on/off miniature switch in Dual in Line standard pin arrangement, which is mounted direct into pcb boards. The reduced outline dimensions allow to insert the switch automatically and the inmoduled terminals are absolutely proof against contamination of flux and soldering solvents. The adjustment of the different switch elements is facilitated by different plastic colors.

Specifications	2 to 12 pole DIP switch, tape is possible
Dimensions	30.5 x 7 x 3.6 mm
Pining	DIL spacing
